(54) A camera capable of recording and reproducing a photographed image.

(57) A camera (101) able to record and reproduce a photographed image includes a storage medium (110) for storing a photographed image, and a reproduction device for reproducing the photographed image. The reproduction device has a reproducing head (201) movable between a contraction position and a withdrawal position. Another camera has a first

mode where photography is executed and a photographed image is recorded to a second mode where the recorded image is printed. Another camera has a printer device for printing a photographed image recorded on a recording medium on external reproduction paper, the printer device including an opening portion facing the external reproduction pa-

per, and a presser member positionable above the opening portion for pressing the external production paper.
